Experience

Senior UX Designer · Citi

Jan 2021 - present

- Led the end-to-end design of an **advanced biller search** experience, creating a customizable search directory powered by **a database of 60K+ billers**.
- Redesigned the spend summary dashboard for card users, driving **clearer insights into spending patterns**.
- Collaborated cross-functionally with product, engineering, prototyping, research, and QA teams, partnering with **50+ stakeholders** to deliver cohesive solutions.
- Delivered high-fidelity designs for new web and mobile banking features, enhancing user experience, streamlining development, and **reducing business costs**.
- Built a scalable Pay design system with reusable components, **cutting design time by 60%** and improving visual and functional consistency across Citi products.

UX/UI Designer · Deepvoxel

Jul 2020 - Oct 2020

- Managed projects and led onboarding for early-stage startups, collaborating with product and engineering teams.
- Developed user-centered web interface for MedTech clients, to increase **conversion rates by 30%** within two months.
- Spearheaded email campaign strategy to improve user onboarding and achieving **1.5% click-through rate**.

Interaction Designer · Toyota Research Institute

Dec 2019 - Jun 2020

- Designed in-car conversational UX demo for Toyota's future mobility concept to contribute to the high-profile Toyota YUI project for **Tokyo 2020 Summer Olympics**.
- Partnered with cross-functional teams in developing UX strategies and multimodal user interfaces to enhance end-to-end autonomous riding experience.
- Translated complex end-to-end riding experiences into technical specifications using markup languages to facilitate seamless communication with development teams.
